PROFESSIONAL SUMMARY

Results-driven Automation Test Engineer / QA Automation Engineer (SDET) with 4.5+ years of experience designing, building, and maintaining end-to-end test automation frameworks for enterprise web, API, and CRM applications. Deep expertise in Selenium WebDriver, REST Assured, BDD Cucumber, TestNG, and Jenkins CI/CD. Proven ability to reduce regression cycle time by 40%, cut post-release defects by 25%, and eliminate 60% of manual API testing effort. Skilled in Agile/Scrum QA processes, test planning, defect lifecycle management, and cross-functional collaboration. Azure-certified (AZ-900). Strong advocate for shift-left testing, quality-first engineering, and continuous improvement.

TECHNICAL SKILLS

Languages: Java (Core), SQL

Automation Frameworks: Selenium WebDriver, TestNG, BDD Cucumber (Gherkin), REST Assured, Page Object Model (POM)

Testing Types: Functional, Regression, Smoke, Sanity, Integration, API, UAT, Cross-Browser, Data-Driven, End-to-End

API Testing: REST Assured, Postman — REST/JSON validation, contract testing, data-driven API testing

CI/CD & DevOps: Jenkins, Git (GitHub/GitLab)

Test Management: JIRA (defect tracking, test management), Extent Reports, Cucumber HTML Reports

Methodologies: Agile/Scrum, Shift-Left Testing, BDD

Databases: Oracle SQL — query writing and DB validation

Cloud: Microsoft Azure (AZ-900 Certified)

Frontend (context): HTML, CSS — for UI element inspection and test authoring

PROFESSIONAL EXPERIENCE

Senior Systems Engineer – QA Automation (SDET) | Infosys Limited Nov 2021 – Present

- Designed and maintained scalable test automation frameworks using Selenium WebDriver, Java, and TestNG — applying Page Object Model (POM) for high reusability and reduced maintenance overhead by 30%.
- Executed functional, regression, smoke, sanity, and end-to-end testing across web and API layers, reducing post-release defects by 25%.
- Built REST API automation test suites using REST Assured and Postman, validating 100+ endpoints for correctness, response structure, and data integrity.
- Integrated automated test suites into Jenkins CI/CD pipelines for continuous testing on every code commit, accelerating deployment cycles by 20%.
- Participated in Agile/Scrum ceremonies — sprint planning, daily stand-ups, and retrospectives — contributing QA perspectives to sprint goals and release readiness.
- Managed end-to-end defect lifecycle in JIRA: logging, triaging, prioritizing, retesting, and closing critical defects in coordination with dev and product teams.
- Conducted test planning, test case design, and traceability matrix creation to ensure complete requirement coverage on every release.
- Mentored junior QA engineers on automation best practices, framework design, and code review processes.

KEY PROJECTS

Project 1: Dynamics for Microsoft & Consumer CRM — UI & Regression Automation

Infosys Limited | Enterprise CRM | Selenium WebDriver, Java, TestNG, Jenkins, JIRA

- Designed comprehensive test plans, test suites, and test cases covering multiple CRM modules and Lines of Business, ensuring full functional and regression coverage.
- Automated 300+ test scenarios using Selenium WebDriver + TestNG, reducing regression cycle time by ~40% and enabling faster, more reliable release cadence.
- Applied Page Object Model (POM) design pattern, improving framework maintainability and enabling reuse across modules.
- Performed data validation, performance checks, and security compliance testing, achieving high accuracy across all test runs.
- Integrated test suites into Jenkins CI/CD pipelines for continuous automated testing with every code push.

Project 2: 3D Jewellery Rendering Application — Automation & Manual QA

Infosys Limited | E-Commerce / Rendering | Selenium WebDriver, Java, TestNG, JIRA, JSON

- Designed JSON-based test configurations to validate positive and negative rendering workflows across multiple browsers and devices.
- Automated UI test cases with Selenium WebDriver + TestNG, improving test execution efficiency by 50% and expanding regression coverage.
- Performed cross-browser and cross-device compatibility testing, ensuring consistent rendering behavior across all target platforms.
- Led end-to-end UAT and production validation cycles, ensuring application stability and zero critical issues at go-live.
- Managed full defect lifecycle in JIRA — logging, retesting, and driving resolution of issues within sprint timelines.

Project 3: Healthcare Patient Portal — BDD Cucumber Automation Framework

Infosys Limited | Healthcare / Web App | Selenium WebDriver, Java, Cucumber BDD, TestNG, Jenkins, JIRA

- Designed and implemented a BDD test automation framework using Cucumber and Gherkin, enabling business stakeholders to review and contribute to test scenarios.
- Automated 150+ end-to-end scenarios covering patient registration, appointment booking, and medical records using Selenium WebDriver + Cucumber.
- Applied Page Object Model (POM) design, cutting code duplication by 45% and significantly improving framework scalability and maintainability.
- Integrated Cucumber HTML and Extent Reports into Jenkins pipeline, delivering real-time dashboards and failure traceability for QA and dev teams.
- Executed smoke, regression, and sprint-end test cycles, achieving 95%+ automation coverage on critical user journeys and reducing manual QA effort by 50%.

CERTIFICATIONS

Microsoft Certified: Azure Fundamentals (AZ-900) — Earned: March 2024

- Credential ID: 9AD8250381C7CFB2 | Certification No: 260A0E-43F3F7
- Key areas: Cloud Concepts, Azure Services, Azure Pricing & Governance

EDUCATION

B.Tech in Civil Engineering | MVGR College of Engineering, Vizianagaram |

Graduated July 2021 | CGPA: 8.9 / 10.0
