Vizianagaram, Andhra Pradesh - 535217, India

SUMMARY

Results-driven **Automation Test Engineer** with **4.5 years** of experience in test automation and quality engineering. Strong expertise in **Selenium**, **REST Assured**, and **Jenkins** for developing scalable automation frameworks and integrating **CI/CD pipelines**. Proficient in **API testing**, **database validation**, and **Azure cloud** environments, with a focus on test optimization, code quality, and continuous testing. Adept at collaborating with **cross-functional teams** to build robust, high-performance applications and accelerate release cycles.

PROFESSIONAL EXPERIENCE

Senior Systems Engineer – Automation Testing

Infosys Limited | Nov 2021 – Present

- Developed and maintained scalable **automation frameworks** using **Selenium WebDriver**, **Java**, and **TestNG**, ensuring high **reusability and maintainability** of test scripts.
- Reduced **post-release defects by 25%** through effective UI, functional, and regression testing strategies.
- Performed **API testing using Postman**, validating **endpoints**, **request/response structures**, and ensuring data accuracy and reliability.
- Collaborated with **cross-functional teams** including development, product, and design to identify, analyse, and resolve **critical defects**, improving overall user experience.
- Managed complete **defect lifecycle in JIRA**, including logging, tracking, prioritization, retesting, and closure.
- Integrated automated test suites into **Jenkins CI/CD pipelines**, enabling continuous testing and faster **deployment cycles**.

PROJECTS

Project A: Dynamics for Microsoft & Dynamics for Consumer – Automation Testing

- **Designed and maintained** comprehensive test plans, test suites, and test cases using Selenium WebDriver with Java, ensuring full coverage across multiple CRM modules and Lines of Business (LOBs).
- Automated 300+ functional test scenarios using **Selenium WebDriver**, **TestNG**, and **Java**, reducing regression testing cycle time by approximately 40%.
- **Performed end-to-end testing** with a strong focus on data validation, application performance, and security compliance, achieving high accuracy and reliability in test execution.
- Collaborated with development teams to integrate automated test suites into **CI/CD pipelines** using **Jenkins**, enabling **continuous testing** and faster release cycles.
- **Created, reviewed, and managed** code through pull requests, ensuring adherence to coding standards, test automation **best practices**, and **maintainable** framework design.

Project B: Database Migration from DB2 to PostgreSQL

- **Extracted**, transformed, and migrated **2TB** of data from **DB2** to **PostgreSQL**, ensuring zero data loss and 100% migration success rate.
- **Converted** Oracle SQL scripts to **PostgreSQL-compatible** scripts, reducing migration time by **30%**.
- **Executed** scripts and imported data into PostgreSQL, maintaining 100% schema integrity.
- **Resolved compatibility issues** and performed **extensive validation** to ensure data consistency.

Project C: 3D Jewellery Model Rendering Application – Automation & Manual Testing

- **Designed and executed** detailed test scenarios using JSON-based configurations to validate both positive and negative workflows for 3D model rendering.
- Performed **Sanity and Regression** Testing across multiple browsers and devices using **Selenium WebDriver with Java**, ensuring accurate rendering of customized 3D jewellery models.
- Automated UI test cases using **Selenium WebDriver, Java, and TestNG**, improving test execution efficiency by 50% and enhancing regression coverage.
- Logged, tracked, and managed defects using **JIRA**, ensuring timely resolution, retesting, and closure of issues.
- Conducted end-to-end **User Acceptance Testing (UAT)** and production validation, ensuring application stability, functionality, and cross-browser compatibility.

EDUCATION

Bachelor of Technology (B. Tech) in Civil Engineering

MVGR College of Engineering, Vizianagaram, India – Graduated: July 2021
CGPA: 8.9/10.0

Higher Secondary Education (Class XII)

JVS Junior College, Vizianagaram, India – Completed: April 2017
Percentage: 98.2%

Secondary School Education (Class X)

Government High School, Nellimarla, Vizianagaram, India – Completed: April 2015
GPA: 9.2/10.0

SKILLS

Programming Languages: Core Java, Python

Testing Frameworks & Tools: Selenium WebDriver, TestNG, BDD Cucumber

API Testing Tools: REST Assured, Postman

Database Languages: SQL

Frontend Technologies: HTML, CSS

Other Tools & Technologies:

- **Postman** (API testing and collections)
- **Git** (Version Control)
- **Jenkins** (Continuous Integration/Deployment)

CERTIFICATIONS

Microsoft Certified: Azure Fundamentals (AZ-900)

- **Credential ID:** 9AD8250381C7CFB2
- **Certification Number:** 260A0E-43F3F7
- **Earned on:** March 1, 2024
- **Key Areas:** Cloud Concepts, Azure Services, Azure Pricing, Azure Solutions

ADDITIONAL INFORMATION

- **Languages Known:** English, Hindi, Telugu
